

# AMS Platform

## AI-Powered Asset Management Software | Value Strategy Consulting

### The Problem

Industrial plants lose **\$1.2M+ per year** to unplanned downtime. Maintenance teams rely on spreadsheets, paper forms, and disconnected systems. **73% of work orders** lack proper planning, leading to repeated failures, safety incidents, and wasted resources.

### The Solution

**AMS Platform** is an enterprise-grade, AI-driven maintenance management system with **33 intelligent agents**, end-to-end workflows, predictive analytics, and multi-plant architecture — deployed in **5 minutes** via Docker.

### Platform at a Glance

|               |         |           |            |           |             |             |
|---------------|---------|-----------|------------|-----------|-------------|-------------|
| 404           | 49+     | 33        | 6          | 3         | 60+         | 5 min       |
| API Endpoints | Modules | AI Agents | User Roles | Languages | Data Models | Deploy Time |

### Core Capabilities

#### Work Management

Full lifecycle: **Work Requests** → **Planning** → **Scheduling** → **Execution** → **Closure**. SAP-integrated workflows with automated status transitions and approval chains.

#### AI Agents (CORTEX)

**33 specialized agents**: Equipment Doctor, Predictive Health, Smart Backlog, KPI Watchdog, RCM Advisor, Safety Checklists, Budget Sentinel, Chronic Failure Tracker, and more.

#### Analytics & KPIs

Real-time **MTBF, MTTR, OEE, Availability** tracking. Executive and tactical dashboards with trend analysis, Pareto charts, and automated alerts.

#### FMEA / RCM

Failure Mode Analysis, RCM decision logic, criticality assessment, FMECA worksheets — aligned with **ISO 14224** standards.

#### Smart Scheduling

AI priority-based distribution across Mon-Fri. **Gantt visualization**, HH balance by specialty, material readiness verification before execution.

## Mobile PWA

Field technician app: create WRs, execute tasks, capture photos. **Works offline** with automatic sync when reconnected.

## Proven Impact

| 40%                             | 25%                               | 60%                  | 3x                         |
|---------------------------------|-----------------------------------|----------------------|----------------------------|
| Reduction in Unplanned Downtime | Improvement in Schedule Adherence | Faster WO Processing | Faster Root Cause Analysis |

## Technology & Security

| Technology Stack                                | Enterprise Security                               |
|-------------------------------------------------|---------------------------------------------------|
| FastAPI (Python) + React 18 + Tailwind CSS      | Role-based access control (6 roles)               |
| SQLite / PostgreSQL — upgradeable               | Brute-force protection (lockout after 5 attempts) |
| Docker Compose — single command deploy          | Rate limiting (API, Auth, Admin tiers)            |
| Anthropic Claude AI — multi-agent orchestration | CSP, HSTS, X-Frame-Options headers                |
| Nginx reverse proxy with SSL/TLS                | Bcrypt password hashing with salt                 |
| JWT authentication with refresh tokens          | Gzip compression, immutable asset caching         |

## Pricing

| Starter                    | Professional (Popular)       | Enterprise               |
|----------------------------|------------------------------|--------------------------|
| \$25/user/mo               | \$45/user/mo                 | Custom                   |
| 1 plant                    | Up to 5 plants               | Unlimited plants         |
| Up to 10 users             | Unlimited users              | On-premise deployment    |
| Core maintenance workflows | All AI agents (CORTEX)       | SAP full integration     |
| Basic analytics            | Advanced analytics & reports | Custom AI agent training |
| Email support              | FMEA / RCM modules           | Dedicated support + SLA  |
|                            | Priority support             | Data migration service   |
